

We Need Your Help This Summer Protecting Cayuga Lake from Harmful Algal Blooms (HABs)!

*Harrier: [har-ee-er] noun, from the verb *harry*, to harass or attack repeatedly. Example: A Harrier Hawk attacks small game.

▲ Who can volunteer?

- Anyone! Lake shore homeowners and avid boaters and anglers are especially encouraged to participate.

▲ What does being a HABs Harrier entail?

- Attend a two hour HABs identification and sampling workshop in June.
- Survey assigned length of shoreline once a week, mid-July through September.
- Collect HABs samples and transport them to CSI lab for further analysis.
- Be available to respond to HABs sightings reported by members of the public

▲ What can I do if I can't volunteer but still want to be involved?

- Learn about HABs and how to recognize blooms (visit www.dec.ny.gov).
- Permit volunteers to survey and collect samples along your lake front property.
- Report suspicious algal blooms.

Attend a Workshop! RSVP to programs@cayugalake.org

June 13th,
5:30 – 8:30 PM
Wells College
Aurora, NY

June 14th,
1:00 – 4:00 PM
Tompkins County Health Dept.
Ithaca, NY

June 21st,
5:30 – 8:30 PM
Canoga Fire Dept.
Seneca Falls, NY
